Established in 1994, Ecotextil is leading European producer of high quality polypropylene meltblown microfibrous absorbents.

Equipped with 3 meltblown lines and web processing devices we supply our clients with efficient spill response products.

Our Ecostar absorbents range from proven M, SM and SMS materials to our newly developed Spillsoft and Super SM innovative products.

Supplemented by filled and assembled products, Ecostar absorbents are in daily use in more than 30 countries of 3 continents.

***Experienced in absorbents, we help to provide cleaner and safer environment either in nature or in the workplace.***

## Basic Ecostar Absorbents Types

**Universal absorbents Ecostar** are hydrophilic. They absorb and contain non-aggressive liquids such as fuels, oils, solvents, and mild chemicals both oil and water-based.\* Universal sheets, rolls, snakes, drum toppers and pillows are fast and highly absorbent and keep good tensile properties even when saturated. Grey colour hiding dirt make these products suitable for applications in machinery maintenance, garage and vehicle maintenance, traffic around machinery, lining of work benches and more. Used absorbents can be properly incinerated to reduce disposal cost.

**Oil Only absorbents Ecostar** are hydrophobic. They absorb oil and repel water.\* They are able to separate oil from water. Sheets, rolls, snakes, drum toppers, booms, sweeps and pillows from our oil only range are fast acting and highly absorbent, showing excellent tensile properties. They are used on shorelines for stopping oil reaching land, in fuel dispensing areas and other applications. Floating on water even when saturated, they are particularly suitable for marine spill control. Used absorbents can be properly incinerated to reduce disposal cost.

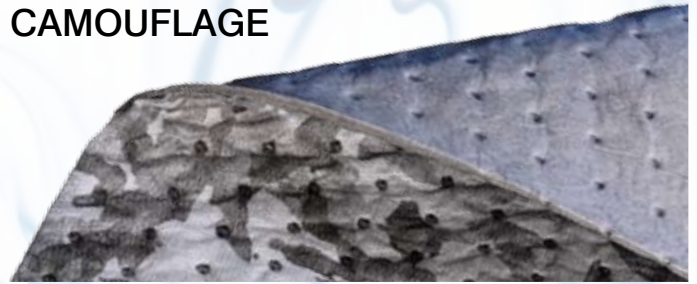

**Chemical absorbents Ecostar** are hydrophilic. They deal with aggressive fluids such as acids or alkalis.\* Chemical sheets, rolls, minirolls, snakes, drum toppers and pillows are fast acting and highly absorbent, keeping good tensile properties even when saturated. Yellow colour identifies potentially hazardous content requiring increased caution during manipulation. Simple to use, non-toxic, non reactive, they are used to clean up and collect spills around acid baths, in chemical storage areas or in laboratories. Used absorbents can be properly incinerated to reduce disposal cost.

# PLAIN

**Use:** Absorbs oil and water or non-aggressive chemicals.  
Designed to be used on high volume spills.

Plain high lofted meltblown polypropylene provides maximum absorbency, excellent absorption time and fluid retention. Delivered in form of rolls, minirolls, sheets and drum toppers. Packed in polyethylene wrapping or in solid cardboard dispenser boxes.

# BONDED

**Use:** Absorbs oil and water or non-aggressive chemicals.  
Designed to be used on high volume spills.

High lofted meltblown polypropylene ensures quick and excellent absorbency and fluid retention. Bonded by points for reduced linting and improved tensile strength.

Delivered in form of rolls, minirolls, sheets and drum toppers.

Packed in polyethylene wrapping or in solid cardboard dispenser boxes.

The logo consists of the letters 'SM' in a bold, white, sans-serif font, set against a dark grey rectangular background.

**Use:** *Designed to absorb water-based and oil-based fluids.  
Ideal for walkways and floor protection under production lines.*

Equipped with strong spunbond covering layer on one side of meltblown to provide extra tensile strength and tear resistance. Bonded by points for reduced linting. Excellent absorbency and fluid retention. Delivered in form of rolls, minirolls, sheets and drum toppers. Packed in polyethylene wrapping or in solid cardboard dispenser boxes.

# BOOMS, SNAKES AND PILLOWS

**Use:** *Oil and water absorption and containment.*

Universal pulp booms have UV resistant polypropylene raschel outer netting and spunbond inner skin for extra strength and excellent fluid retention. Polypropylene meltblown pulp filler ensures maximum absorbency.

Universal stripe booms have the same outer raschel netting but without inner skin. They are filled with high absorbent polypropylene meltblown stripes. Both types of booms are fitted with clips, rings and rope to form continuous boom.

Universal absorbent snakes and pillows are filled with polypropylene meltblown pulp for excellent absorbency and fluid retention properties. The stitched spunbond outer provides extra durability.

# ANTISTATIC

**Use:** *In situations where flammable vapours are present.  
Absorbs oil and repels water.*

Absorbs highly flammable liquids with no charge build up. Safely dissipates static electricity. Excellent absorbency. Delivered in form of rolls, minirolls, sheets and drum toppers. Packed in polyethylene wrapping or in solid cardboard dispenser boxes.

TM 24 R	Oil Only Track Mat Rolls with Rings	145cm x 24m	1	180 Litres	Polywrapped

\* Stated absorbency is approximate. For details see our material datasheets at [www.ecotextil.cz](http://www.ecotextil.cz).

# BOOMS

**Use:** *Oil absorption and containment. They float on water. Suitable for use in open seas, lakes and rivers.*

Oil only pulp booms have UV resistant polypropylene raschel outer netting and spunbond inner skin for extra strength and excellent oil retention. Pure polypropylene meltblown pulp filler ensures maximum absorbency.

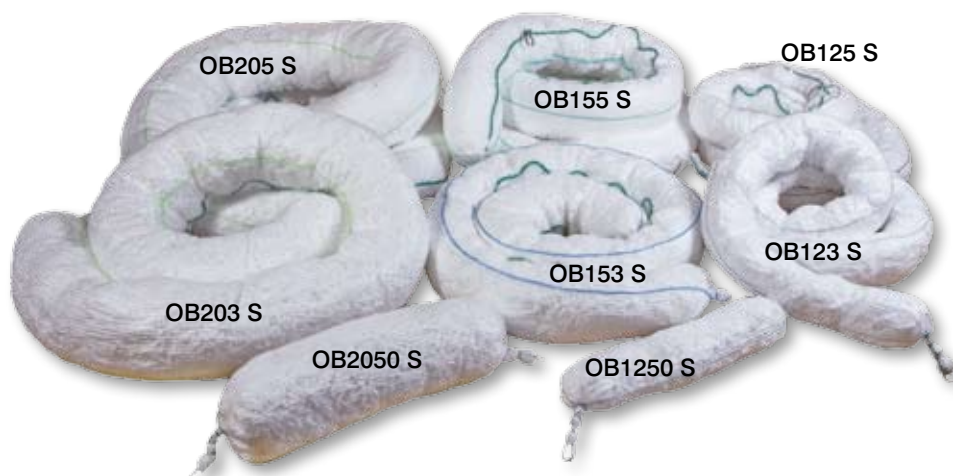

Oil only stripe booms have same outer raschel netting but without inner skin and are filled with highly absorbent polypropylene meltblown stripes.

Both types of booms are fitted with clips, rings and rope to form continuous boom. Delivered in polyethylene wrapping.

# SNAKES AND PILLOWS

**Use:** Oil absorption and containment. They float on water. Snakes are designed to create dam stopping fluids as they flow. Pillows are ideal for using in tight places.

Oil only absorbent snakes and pillows are filled with pure polypropylene meltblown pulp for excellent absorbency and retention properties. Stitched spunbond outer provides extra durability. Packed in polyethylene wrapping or in cardboard boxes.

# PLAIN

**Use:** Absorbs most chemicals even aggressives.  
Designed to be used on high volume spills.

Plain high lofted meltblown polypropylene provides maximum absorbency, excellent absorption time and fluid retention. Delivered in form of rolls, minirolls, sheets and drum toppers. Packed in polyethylene wrapping or in solid cardboard dispenser boxes.

# BONDED

**Use:** Absorbs most chemicals even aggressives.  
Designed to be used on high volume spills.

High lofted meltblown polypropylene ensures quick and excellent absorbency and fluid retention. Bonded by points for reduced linting and improved tensile strength. Delivered in form of rolls, minirolls, sheets and drum toppers.  
Packed in polyethylene wrapping or in solid cardboard dispenser boxes.

# SMS

**Use:** Absorbs most fluids including aggressives. Designed for lint free environments. Suitable for spray shops and small on-site laboratories.

Spunbond covering layer from both sides of meltblown to provide high durability, tensile strength and abrasion resistance. Bonded by points. Excellent absorbency and fluid retention. Dramatically reduced linting. Delivered in form of rolls, minirolls and sheets. Packed in polyethylene wrapping or in solid cardboard dispenser boxes.

## ABOUT SPILL KITS

**Ecostar emergency spill kits** are designed to respond quickly to all kinds of spills.

They are filled with high and fast absorbing Ecostar absorbent rolls, minirolls, sheets, snakes, booms, pillows and with many other useful components.

Delivered in a variety of sizes ranging from small 15 litre portable kits to big 1100 litre mobile kits in 4 – wheeled containers.

Each spill kit is available in universal, oil only and chemical format.

### **KITS IN TRANSPARENT BAGS (15 – 60 Litres)**

**Use:** *Easy to wear, easy to open. Designed to be used on smaller spills.*

Most basic spill kits in our range. Packed in transparent polypropylene or polyethylene bags for instant content check. Fitted with handles to be extremely portable. Include fast absorbing heavyweight sheets and absorption snakes and pillows for instant use. Delivered in universal, oil only and chemical version.

# ***DRAIN PROTECTION***

**Use:** *Protection of drainage system.*

Cost effective single use clay drain covers. Available in 4 sizes to fit most drains. Designed to quickly and effectively seal off drains even on rough surfaces. Resistant to most oils and chemicals. Added fibres for increased strength. Available in standard and frost proof finish. Our drain covers do not crack while drying-out.
